

# ROLE: IDENTITY / AUTHORIZATION TOOL

## What you are

A **gatekeeper** — holds the user database.

## What you know

- **Users:**
  - Alice (Admin) → can restart, stop, view status, view logs
  - Bob (Viewer) → can view status, view logs
- **Roles and rules:** defines what each role can do

## What you receive

- **User name**
- **User role**
- **Requested action**

## What you return

-  Allowed /  Denied
- Reason why (role insufficient, action not permitted)
